

2026

Waste Disposal Calendar

Take your waste in the designated bag to the collection area by 8:30 a.m. on the collection day.

Inashiki City (Edosaki area)

Each household may take up to five bags of combustible waste to the collection point each collection day.
Tie the designated bag and place it in the designated area.

It's against the law to leave recyclables with other waste!!

*There will be special collection on December 30 (Wed). *Please note that due to the New Year's holiday from January 1 to 3, the weekly collection cycle for non-combustible trash will begin on the second week of the month.

Category	Example items	Disposal method
Combustible waste	Food waste / waste paper, etc. Leftover food, grass, dead leaves Cloth, leather waste Clothing, shoes, bags Wood, branches Woodchips, small branches, wooden toys Plastic products CD cases Disposable lighters Hangers / buckets, etc. Stained containers Mayonnaise containers, etc.	- Remove excess liquid from kitchen refuse. - Harden excess cooking oil or soak it up with paper or cloth. - Small branches must be no more than 50cm in length and 5cm in thickness and tied up in bundles when left at the collection point. However, to dispose of more than five bundles at once, please bring them to a collection center. - Paper diapers must have excrement removed before disposal. - Plastic products without a recycle mark, tissue paper, toilet paper, and post displaying personal information are classified as combustible waste.
Bottles, glass	Empty bottles Liquor, beer, soft drink bottles Glass Cups, glass sheets, mirrors, fluorescent bulbs, light bulbs	- Remove the caps from empty bottles and rinse them with water. (Metal and plastic caps must be disposed of separately.) - Wrap broken items like glass in newspaper or something similar when disposing of them to prevent injury.
Metals	Empty cans Empty cans, gas cylinders for tabletop stoves, spray cans Small household appliances Rice cookers, telephones, hair dryers Metals Saucepans, kettles, kitchen knives, umbrellas, frying pans, dry cell batteries, hot water/hot drink pots (including thermos flasks) Porcelain and earthenware Small bowls, plates, clay pots Commonly used devices containing lithium-ion batteries, etc. Mobile battery packs, e-cigarettes, handheld electric fans	It is dangerous to make holes in spray cans. - Spray cans and gas cylinders for tabletop stoves can explode, so make sure you always use all of the gas. - Wrap sharp objects like blades in newspaper or something similar when disposing of them to prevent injury. - Please make sure cans are empty and rinsed with water. - Small household appliances (such as mobile battery packs and e-cigarettes) with lithium batteries in them can heat up and ignite if they receive shocks, so put them out on the Metals day or in the designated small household appliance collection boxes.
Plastic containers and packages	Bottles Film Trays Packs, cups, etc. Caps Polystyrene	Items that fit into this category are marked with this symbol. - These items must be emptied, rinsed with water and then drained. - When putting out PET bottles, remove the label and cap and put out only the bottle in the specified bag. Remove the cap for safety. (including PET bottle caps) - Those that cannot be cleaned or that are heavily stained as well as plastic products are combustible waste.
Paper containers and cartons	Paper boxes Wrapping paper Paper cups Paper bags Lids Paper cartons, etc.	Item that fit into this category are marked with this symbol. - Please remove anything attached to plastic waste if it is not paper. If it cannot be removed, dispose of the item as combustible waste. - Products processed with aluminium (the back side will be silver colored) should be disposed of as combustible waste. - Dispose of any paper product that is badly stained as combustible waste.
Newspapers, magazines, cardboard	Newspapers, Fliers Magazines Cardboard	- Dispose of by folding and putting into piles no more than 50cm in length or width and binding with string. (Newspaper and fliers may also be disposed of in paper bags from newspaper delivery shops.) - Make each bundle about 30cm tall. - Bundle newspapers (fliers), magazines and cardboard separately. - Remove plastic book covers from books.
PET bottles	PET bottles that contained soft drinks, soy sauce, minn, alcohol, vinegar, sauces, dressings, etc. Item that fit into this category are marked with this symbol. Remove the cap and label, rinse with water, then crush.	Dispose of lithium-ion batteries properly. - Lithium-ion batteries can catch fire if they receive shocks. - If they are mixed with combustible waste or recyclable waste, there is a high risk of them causing fire in the garbage collection vehicle or within the garbage incineration facility. - Ensure that you either put them out on the Metals day or in the designated small household appliance collection boxes.
Oversized waste	Furniture, bedding Home appliances Other items	Directly taking items to the waste facility (Please secure all trash before transporting it to prevent any scattering.)
The following items are not accepted Ash Fire extinguishers Bricks New building materials (plasterboard, insulation, etc.) Motorcycles, tires, car batteries Polystyrene (for industrial use) Medical waste Waste oil, paint Power cables, TV cables Plastic sheets for agriculture Propane gas containers Roofing tiles (including thatched roofing) Sinks, bathtubs, toilets Industrial refrigerators, vending machines Concrete, cinder blocks Trash containing asbestos *Check the Waste Classification Guidebook or contact us to inquire about items not listed above that do not fit clearly into a category.		
Make use of the recyclable collection activities by local groups!		

Children's groups and other local groups register with the city and independently collect household recyclable waste.
These groups are awarded subsidies based on the quantity of materials they are able to gather.

Sanitation and Civil Engineering Association of Edosaki District
